

Winbak Farm is proud to be able to assist its clients with their horses each year, including offering boarding options for mares to foal, mares to be bred, and the sale preparation of yearlings. As with any business, we always strive to make improvements to better serve our clients. Starting in 2018, we will be more meticulous when it comes to the paperwork for client horses to arrive at Winbak Farm for any length of time in order to provide the best health and protection to all horses. **Please note: Foaling mares must arrive to Maryland no later than 10 months from the Last Date Bred.**

Below are the required vaccinations any client-owned horse is to have before arriving to Winbak Farm. As in previous years, a negative coggins test is also mandatory.

REQUIRED:

- *Rabies
- *Strangles
- *EHV-1/4 (Rhino)
- *Influenza
- *EHV-1 (Pneumabort K or Prodigy)
if pregnant

HIGHLY RECOMMENDED:

- *Botulism
- *West Nile Virus
- *Eastern/Western Encephalitis
- *Tetanus
- *Potomac Horse Fever

If you wish to adopt the Winbak Farm vaccination protocol, we'll be happy to share that with you and/or your veterinarian upon your request. Please be sure to provide a full year's vaccination history, plus a copy of the negative coggins test and a signed boarding agreement, to the Winbak Farm office before scheduling your horse's arrival to Winbak Farm. Notice must be given with the Winbak Farm office no less than 24 hours in advance of the day in which you'd like to schedule your horse(s) to arrive, and all debts must be paid in full before a horse leaves the care of Winbak Farm.

We thank you in advance for entrusting us with your horse(s), and your understanding on this matter so we can be sure to provide the best possible care.
